Ahmad Salah

Front-End Developer

+972592433871 • Gaza, Palestine • ahmad.work108@gmail.com • LinkedIn • Github

Summary

Front-End Developer experienced in building responsive and scalable web applications using **React.js, Next.js, and TypeScript**. Adept at writing clean and efficient code, integrating REST APIs, and following modern development practices. Quick learner with proven ability to work in agile teams and deliver high-performance user experiences.

Work Experience

2023 – Present
Remote

Front-End Developer
Freelance
- Currently developing **Fenzo** using **Next.js & TailwindCSS**, an e-commerce website focused on wedding decorations and rentals.
- Delivered multiple client projects using modern web technologies, maintaining top-tier performance, accessibility, and responsiveness across devices.

03/2023 – 11/2023
Egypt (Remote)

Front-End Developer
Makla for IT Solutions
- Built a **mini ERP system** using **React.js**, based on the **Fuse React Template** ↗ , to ensure a scalable and professional structure. Implemented a **role- and permission-based access system** (SuperAdmin, Admins, Company Users) and integrated key third-party libraries such as **Google Maps**, Zod, and others.
- Developed an **educational platform for English language learning**, designed for both students and teachers to interact and manage learning materials.
- Collaborated closely with backend developers to integrate well-structured **REST APIs** and ensure seamless data flow.
- Worked with **UI/UX designers** to implement responsive, user-friendly, and accessible interfaces.
- Wrote clean, optimized, and maintainable code under the **guidance** of an **experienced team leader**, following best practices and coding standards.
- Ensured security best practices and data protection across the application stack.

07/2022 – 02/2023
Gaza, Palestine (On Site)

Front-End Developer
Domino ICT
- Built **Vela**, a **private chat application** for companies using **React.js** and MUI, featuring to-do lists, event management, and **video/voice calling**.
- Developed an **interactive dashboard** for a gas station using HTML, CSS, and JavaScript, improving data visibility and operational efficiency.
- Enhanced and maintained features across multiple platforms using React.js, HTML, CSS, and JavaScript.
- Designed and optimized layouts to improve usability, performance, and user experience.
- Ensured cross-browser compatibility and implemented fully responsive designs for all supported devices.

- Converted native applications into mobile-friendly, responsive web interfaces, improving accessibility and user reach.
